How to Understand American Odds

American odds work a little differently to the others.

The odds for a favorite team to win the game are usually listed with a '-' sign,

which indicates the amount a better would need to bet to win \$100.

This shows how much a better would win if they staked \$100.

In another football game on that Sunday, the Buffalo Bills are the underdogs to win at +240 odds.

Good news for the Buffalo Bills and you! They've won the game! You receive \$240 in winnings and you get your original bet of \$100 back, equaling \$340 in total.

So that was the basics to sports betting using American odds.

The History of Online Sports Betting in Hawaii

Just this year, in May of 2018, Hawaii and every other state in the US was given

a huge opportunity to legalize sports gambling.

Should we ever see Hawaii reverse their political viewpoints on gambling it is likely that the main draw for sports betting would come from their passionate col

legiate sports following and fan base.

Given that online sports betting is still technically illegal within the state,

the issue of no deposit betting is currently moot.

However, in the event that online sports betting becomes legal, Hawaiians can expect a similar approach to what other states are currently offering.

Gamblers in Hawaii shouldn't expect any immediate changes to the laws that have been in place since the state formed all the way back in 1959.

As more and more states begin to enter the world of legalized sports gambling, we might see the more conservative states like Hawaii change their tune.
